Loomer
"Love is a Dull Instrument"
UK Imposition 2005

"An absolutely superb album. I think it's fantastic! I like everything on it." – Bob Harris, BBC

"If you play us, we will come." Or so says, Loomer front man Scott Loomer. In July, 2004, Canadian alt-country stalwarts Loomer released their debut CD "Love is a Dull Instrument" to international critical acclaim. The UK has responded particularly favourably to Loomer's own blend of country, roots and rock and to that end Loomer have decided return the love by inviting themselves over for a wee visit.

So this spring, May 19th to May 28th to be precise, Loomer will be weaving their way around the Kingdom from Southampton to Glasgow spreading the country gospel according to, well...Loomer. Don't miss the band NetRhythms UK called, *"... a wonderful explosion of country rock...surely one of Americana's best bands outside of superstardom... an album and a band that's always on the edge"*, playing songs from an album that Americana UK placed amongst their top albums of 2004 with *"...thirteen magnificently executed songs that draw on some of the darker aspects of life and the relationships that inform our day to day"*
